

CHANGE MANAGEMENT

Successfully Accelerate Through Change

We know how important user adoption is to harnessing the power of NetSuite. That's why we offer customized Change Management services to help your employees successfully navigate through transitions. We help transform your organization as you transform your business. We reduce the time and effort to achieve your implementation goals and focus on creating changes that last over time.

Key Benefits

- **Increased Productivity:** Realize the value of NetSuite faster through increased productivity after your implementation.
- **Sustained User Adoption:** Our initiatives facilitate greater enthusiasm and adoption by your employees for sustained change.
- **Engaged Leaders:** Your company's leaders realize the value of NetSuite and are motivated to engage in the change process.
- **Streamlined Implementations:** Everyone at all levels of the organization is onboard and inspired to achieve success.

How Are We Different?

- Designed for NetSuite so our services wrap seamlessly around the implementation.
- Customized approaches for all market segments.
- Focus on sustained user adoption to ensure that productivity gains are continued over time.
- First change solution for cloud business management.

Our Approach:

By partnering with your leadership team, we help move your employees through the phases of change by leveraging our unique products and services.

We focus our attention on the core activities that will increase user adoption and maximize the effective use of NetSuite.

These activities help to streamline your implementation and increase your return on your investment.

How Our Change Program Works:

Sustained adoption requires your employees to develop a sense of ownership. We use a progressive approach to build ownership in your organization.
