

NETSUITE SUITEBILLING

Billing the Way You Want It

NetSuite SuiteBilling is the leading cloud-based billing solution. From consolidated invoicing, flexible pricing and packaging and automated rating processes, to seamless integrations with NetSuite Advanced Revenue Management and Core Financials modules, NetSuite SuiteBilling provides transparency around all billing activities with a powerful Software-as-a-Service (SaaS) suite.

NetSuite SuiteBilling helps companies streamline billing operations and provides real-time visibility into billing and financial activity enabling companies to turn their billing activities into a conversation with their customers.

Key Benefits

- Consolidated invoices including one-time, project-based and subscription charges.
- Scheduled changes for pricing and subscriptions with effective dates and pro-rating.
- Multi-currency flexibility for subscriptions.
- Real-time reporting including audit logs and change tracking.
- Flexible generic and customer specific subscriptions with volume, tiered and flat pricing models.

Pricing Models

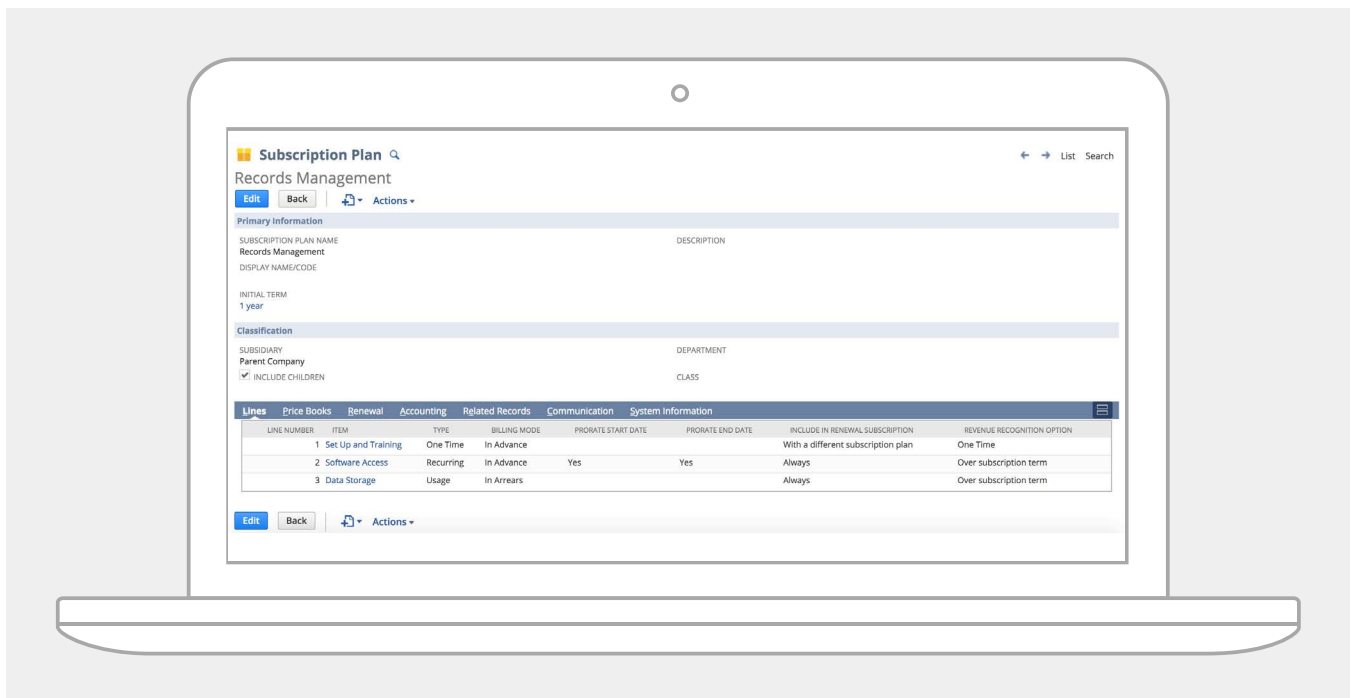

Different pricing models with NetSuite SuiteBilling provide the ability to bill customers in a variety of ways, ranging from a simple flat rate each billing cycle to complex volume or tiered scenarios.

- **Flat Model** – Charge customers the same value each billing cycle.
- **Volume Model** – Based on consumption or entitlement where the highest volume tier unit rate reached is applied to the entire quantity to charge.
- **Tiered Model** – Where the rate for each unit of consumption or entitlement tier is applied

to a given range. The total end rated value is comprised of varying per unit rates to achieve the final amount to charge.

Rating Models

NetSuite SuiteBilling gives businesses the flexibility to have invoice charges represented as either one-time, in-advance or in-arrears in one customer subscription. By varying rating models in one subscription, companies can create a subscription that captures setup fees, license counts and variable consumption all in one step. Giving users the ease of use to setup and maintain subscriptions increases efficiency, while supporting flexible rating models for billing processes.

Change Orders

NetSuite SuiteBilling allows organizations to schedule and automate changes to subscriptions. Change orders provide the ability to schedule an immediate or future dated change to pricing and/or quantities on subscriptions. Eliminate the need to manually monitor and track customer subscription changes. With NetSuite SuiteBilling these changes can be recorded at the time they are identified and will be active upon reaching the effective date set on the change order. All change orders support prorating of invoice lines to capture pricing and/or quantity changes over a period of time based on the set effective date.

Customer Specific Pricing and Discounting

NetSuite SuiteBilling provides the ability to create both common pricing templates and customized scenarios to support customer specific deal negotiations and contracts. Generic subscriptions can be created and used for all customers or a specific subset. Customized subscriptions built off alterations to existing subscriptions, or net-new, enable users to create specific pricing and contract agreements for customers, including specific discounting rules per item in the subscription.

The screenshot displays two overlapping windows from the NetSuite SuiteBilling interface. The top window is titled "Subscription Change Order - Modify Pricing" and shows a form for creating or modifying a change order. It includes fields for "NUMBER", "EFFECTIVE DATE" (set to 4/13/2017), and "REQUESTER" (Trevor Vollet). Below the form is a table of subscription lines with columns for include, line number, status, item, price plan, new price plan, quantity, new quantity, discount, new discount, start date, and end date. Three lines are visible: Line 1 (Set Up and Training, Closed, 100% discount), Line 2 (Software Access, Active, 0% discount), and Line 3 (Data Storage, Active, 0% discount).

The bottom window is titled "Subscription" and shows details for a specific subscription. It includes fields for "SUBSCRIPTION ID", "CUSTOMER", "BILLING ACCOUNT", "SUBSIDIARY", "CURRENCY", and "SUBSCRIPTION PLAN". Below this is a table of subscription lines with columns for edit, view, line number, item, billing mode, status, quantity, discount, start date, recurrence start date, end date, termination date, and sales order line number. Three lines are visible: Line 1 (Set Up and Training, In Advance, Closed), Line 2 (Software Access, In Advance, Active), and Line 3 (Data Storage, In Arrears, Active).
