

A PATHWAY TO SUCCESS:

Leading Practices for the Modern Manufacturer

With thousands of successful implementations, Oracle NetSuite has a deep understanding of manufacturing businesses across all sectors and the many challenges they face. As the pace of change in business accelerates—especially for those still relying on aged, on-premise ERP systems, manufacturers are struggling to keep up. While they strive to improve business performance and increase customer satisfaction in an increasingly competitive environment, they struggle with:

- Metrics based on unreliable data.
- Ineffective inventory utilization.
- Difficulty expanding into multiple channels.
- Inefficient order processes and inaccuracies.
- Inconsistent order orchestration and lack of inventory visibility.
- Manual processes that cannot scale.

“NetSuite’s SuiteSuccess is both a mechanism for rapid deployment and a very specialized solution. And NetSuite has accomplished this in a single suite, with the benefits inherent in a true multi-tenant SaaS solution. Customers are pumped to consume capabilities based on very specific industry needs and to re-imagine consumption models to drive faster time to value, better ROI and greater user adoption.”

Cindy Jutras, President, Mint Jutras

As they seek to address these challenges, manufacturing companies are concerned about the time and capital required to fix their back-end systems. However, they realize that the ability to rapidly adapt and scale is critical to their success. What they need is a proven solution that can rapidly accelerate their business with a modern architecture—to go from zero to cloud in 100 days or less. *What they need is Oracle NetSuite.*

Oracle NetSuite delivers a unique set of processes, activities and systems specifically designed to deliver rapid value. It provides customers with a strong foundation to transform

their business with a pre-configured solution and methodology that includes proven:

- 19 pre-configured functional roles
- 19 dashboards
- 75 KPIs
- 250 pre-configured reports

These leading practices leverage Oracle NetSuite’s unmatched experience and knowledge of accounting and financials processes. The focus is on enabling our customers to rapidly meet their business objectives and seamlessly grow and scale with Oracle NetSuite.

Oracle NetSuite’s proven methodology for manufacturing success.

A Proven Path to Success for Manufacturers

Oracle NetSuite delivers a unified and phased pathway for customers to succeed and scale their business. Here is how it works:

- The first step is all about making sure manufacturers have a single view of customers, orders, work in progress, items and inventory. From its experience in the sector, Oracle NetSuite knows just how difficult it is to sell anything without it. Getting a manufacturing business on a real-time platform so all channels are operating from a unified base is the critical foundation. Oracle NetSuite has seen customers improve gross margins 1-5%.
- Once there, manufacturers are in a better position to add ecommerce or other omnichannel capabilities to enhance and provide a greater customer experience. This phase is critical as increasingly buyers move online, according to the latest research, 30% of buyers complete at least ½ of their purchases online.
- From this point, they are freed from the constraints of their legacy systems and are ready to tackle challenges such as a lack of visibility or inefficiencies in their supply chain.
- Ultimately, the focus turns to more innovative and disruptive strategies such as pricing and margin management and business intelligence. Oracle NetSuite has seen its customers improve their actionable insights by over 56%.

Oracle NetSuite:
